

I am a student of Business Economics and IT at Kea and I have decided to go for an Erasmus, and it was one of the greatest decisions I have made.

I decided to choose school Hogent in Ghent, Belgium where I attended courses such as International Marketing, Topics of international law, Cross cultural communication, Digital Marketing, Entrepreneurship, Belgian Culture studies, Strategic Management, HRM and Commercial Training for Logistics. Each of the courses was different. However I enjoyed the most Digital Marketing where we learnt about google analytics, Commercial training for logistics where we gain skills how to negotiate and Entrepreneurship where we had to create our business. In the beginning I would advise to choose almost the same subjects as I did however, I was not satisfied with Strategic Management which I had at KEA, due to the teacher. I have failed this class which I knew everything about and passed classes such as Belgian culture without knowing anything, those two subjects I would not recommend.

Atmosphere at school was perfect and whenever I needed help I always received one. During my Erasmus exchange I had classes on campus however due to corona later we had it online, and that is why I have decided to come back to Copenhagen. Yet the whole stay was full of adventures, amazing people and teachers and a beautiful city.

Also I decided to live in a dorm, which was also an amazing experience and the cheapest one. Erasmus money covered all expenses when it comes to accommodation. I met people from different countries and made friends with whom I talk until now everyday. We had dinners together, where we prepared traditional meals from our countries, every second day we played games or we did different activities such as going to the city center, to the student district or taking trips to other cities than Ghent.

Ghent might be a smaller city than Copenhagen, but there are so many students there, and even though corona-parties.

When it comes to prices, usually we found places with cheaper beer, yet prices are average and beer is cheaper than in Denmark. Hogent school provided us with a lot of coupons for free beers, karaoke, discounts for food, discounts for shops and it helped us to not spend too much money.

To sum up, I am satisfied with everything that happened in Belgium. I also think Ghent is one of the best cities to go for exchange to. Student district, cheap coffee on campus, amazing people, trips, beer tasting, belgian fries, and beautiful city are a combination of adventures I will never forget.
